Table Lab

Table Lab allows you to interrogate your research data by creating custom tables where you have complete control over variables, filters, data splits, and more. Find additional insights with a robust set of statistical calculation tools.

Table Lab now includes a 'workbook and sheets' functionality. This allows the creation of sets of tables (sheets) and to save these as a workbooks, which improves efficiency when creating tables in bulk.

Chart Lab

Chart Lab is a complete chart creation tool where you can visualise your research data, create presentation decks, and export to PowerPoint and PDF.

You can combine charts in any way you see fit and add other media such as text, images, and more to tell the story of your data.

Delivery time

The Self-analysis Portal has our quickest turnaround. They can be delivered within one working day.

Includes the following:

Cost

The Self-analysis Portal has a starting price of **£500.00.**

charges may be applied.

Product information

• Online portal to access your data.

• Table Lab: create and export custom data

tables, filter by demographics, and export to Excel.

• Chart Lab: create custom charts and slide decks

and export to PowerPoint.
